Watchlist scorecard

Scores are generated from the editorial inputs used in the website data.js file.

AI research score **63/100** Risk score **62/100**

#1 NSE: SARVESHWAR

Moderate Risk

Rating: Moderate

Data confidence: 82%

Sarveshwar Foods

FMCG / Rice Processing | Check latest price

Rice processing, branded food and export-oriented business. The key research question is whether revenue growth can translate into stronger margins, cash flow and sustainable profitability.

AI research score **41/100** Risk score **81/100**

#2 NSE: VIKASLIFE

Very High Risk

Rating: Very Weak

Data confidence: 72%

Vikas Lifecare

Polymers / Chemicals / Trading | Check latest price

A highly speculative small-cap business with exposure to polymers, chemicals and multiple business initiatives. The core question is whether expansion produces consistent profits and operating cash flow.

AI research score **63/100** Risk score **67/100**

#3 NSE: AFIL

Moderate Risk

Rating: Moderate

Data confidence: 85%

Akme Fintrade India

NBFC / Retail Lending | Check latest price

A retail-focused NBFC serving vehicle, small-business and secured-loan customers. Asset quality, collection efficiency, capital adequacy and borrowing costs matter more than the low share price.

AI research score **36/100** Risk score **85/100**

#4 NSE: FILATEASH

Very High Risk

Rating: Very Weak

Data confidence: 66%

Filatex Fashions

Textiles / Fashion | Check latest price

A speculative textile-category company where governance quality, actual operating performance, cash flow and equity dilution require closer attention than social-media excitement.

AI research score **40/100** Risk score **82/100**

#5 BSE: 524444

Very High Risk

Rating: Very Weak

Data confidence: 70%

Evexia Lifecare

Chemical Trading / Healthcare | Check latest price

A highly speculative company associated with chemical trading and healthcare-related business initiatives. Focus on revenue quality, recurring profits, cash flow and execution rather than the sector label alone.

RISK SCORE

82

DATA CONFIDENCE

Research thesis

Rice processing, branded food and export-oriented business. The key research question is whether revenue growth can translate into stronger margins, cash flow and sustainable profitability.

Positive research points

- Exposure to branded and packaged food products
- Rice processing and export business
- Potential benefit from improving food demand
- Operating leverage possible with revenue expansion

Major risks

- Commodity-price fluctuations can affect margins
- Working-capital requirements may remain high
- Low-margin business model
- Small-cap and penny-stock volatility

How to interpret this score

The AI Research Score is a transparent rule-based editorial score built from financial strength, growth, profitability, debt, cash flow, promoter quality, valuation and liquidity inputs. It is not a price target, trading signal or machine-learning prediction.

Vikas Lifecare

AI RESEARCH SCORE

81

RISK SCORE

72

DATA CONFIDENCE

Research thesis

A highly speculative small-cap business with exposure to polymers, chemicals and multiple business initiatives. The core question is whether expansion produces consistent profits and operating cash flow.

Positive research points

- Exposure to polymer and chemical products
- Multiple potential business verticals
- Low nominal price attracts trading interest
- Possible operating leverage if execution improves

Major risks

- Inconsistent financial performance
- Very high share-price volatility
- Possible equity dilution risk
- Complex business structure and weak cash-flow visibility

How to interpret this score

The AI Research Score is a transparent rule-based editorial score built from financial strength, growth, profitability, debt, cash flow, promoter quality, valuation and liquidity inputs. It is not a price target, trading signal or machine-learning prediction.

Akme Fintrade India

NSE: AFIL | NBFC / Retail Lending | [Check latest price](#)

63

AI RESEARCH SCORE

67

RISK SCORE

85

DATA CONFIDENCE

Research thesis

A retail-focused NBFC serving vehicle, small-business and secured-loan customers. Asset quality, collection efficiency, capital adequacy and borrowing costs matter more than the low share price.

Positive research points

- Exposure to retail and small-business lending
- Potential growth in underserved credit markets
- Secured lending can reduce part of credit risk
- Operating leverage possible with loan-book growth

Major risks

- Credit-cost and non-performing-asset risk
- Dependence on borrowing availability
- Relatively limited listed-market track record
- Low trading liquidity can increase volatility

How to interpret this score

The AI Research Score is a transparent rule-based editorial score built from financial strength, growth, profitability, debt, cash flow, promoter quality, valuation and liquidity inputs. It is not a price target, trading signal or machine-learning prediction.

Filatex Fashions

NSE: FILATFASH | Textiles / Fashion | [Check latest price](#)

36

AI RESEARCH SCORE

85

RISK SCORE

66

DATA CONFIDENCE

Research thesis

A speculative textile-category company where governance quality, actual operating performance, cash flow and equity dilution require closer attention than social-media excitement.

Positive research points

- Exposure to textile and apparel demand
- Potential turnaround narrative
- Low nominal price may attract market attention

Major risks

- Very high governance and disclosure risk
- Weak operating-cash-flow visibility
- Possible dilution and capital-structure concerns
- Extremely high speculative volatility

How to interpret this score

The AI Research Score is a transparent rule-based editorial score built from financial strength, growth, profitability, debt, cash flow, promoter quality, valuation and liquidity inputs. It is not a price target, trading signal or machine-learning prediction.

Evexia Lifecare

BSE: 524444 | Chemical Trading / Healthcare | [Check latest price](#)

40

AI RESEARCH SCORE

82

RISK SCORE

70

DATA CONFIDENCE

Research thesis

A highly speculative company associated with chemical trading and healthcare-related business initiatives. Focus on revenue quality, recurring profits, cash flow and execution rather than the sector label alone.

Positive research points

- Exposure to chemical and healthcare-related segments
- Possible business-turnaround narrative
- Diversified trading activities
- Potential operating improvement if execution stabilises

Major risks

- Highly speculative business profile
- Weak earnings-quality visibility
- Possible equity-dilution risk
- Low liquidity and high volatility

How to interpret this score

The AI Research Score is a transparent rule-based editorial score built from financial strength, growth, profitability, debt, cash flow, promoter quality, valuation and liquidity inputs. It is not a price target, trading signal or machine-learning prediction.

How the research score works

Transparent weights from the website's current data.js scoring model.

Financial strength	20%
Revenue growth	15%
Profit growth	15%
Profitability	10%
Debt position	10%
Cash flow	10%
Promoter quality	10%
Valuation	5%
Liquidity	5%
